DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Morris et al.

Morris et al. Discloses the claimed invention, including two elastic springs **70**, a seat body and movable handle, a longitudinal track is disposed within the sidewall of the handle, a exhibits V-shaped guiding surfaces **48,50** etc., and positioning section **56**. Coupling member **66** is provided as claimed.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1,3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lo in view of Morris et al.

Lo discloses the field of the invention, including a pair of tubes, each housing a spring, and each tube having a groove on an inner wall thereof for receipt of a coupling member **46**. Lo fails to disclose a track with V-shaped positioning and guide sections as claimed.

Art Unit: 3617

It would have been obvious to one of ordinary skill in the art at the time of the invention to substitute a guide and lock section as that taught by Morris et al. for that (Fig. 5) of Lo.

Such a combination would have been desirable at the time the invention was made so as to provide for the secure and dependable control of cleat movement.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Morris, Harris and Harris show cleats as in the present invention.

6. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ed Swinehart whose telephone number is 703-308-2566. The examiner can normally be reached on Monday through Thursday 6:30 am to 2:00 pm..
